

Temp. JS.Browser → JS engine.
↓

```

var money = 50;
function outer(){
  var a = 10;
  console.log(a);
  console.log(money);
  var money = 100;
  console.log(money);
  function inner(){
    console.log(money);
    var p = 10;
    function innerMost(){
      console.log(p);
      console.log(a);
    }
    innerMost()
  }
  inner();
}
console.log(money);
outer();

```

call stack.
